## Water Level Meters

WHEN ACCURACY MATTERS

**T**he HERON dipper-T Water Level Meter is a top of the line instrument providing exceptional value. Many years of field experience have enabled HERON Instruments to design and build Water Level Meters that are rugged, reliable and user friendly.

## Some of the quality features engineered into these units...

- **Unbreakable** Polycarbonate reels\*
  - **Durable polyester** powder coated steel frame
  - **Corrosion resistant** stainless steel fittings
  - **Soft grip** vinyl frame handle
  - **Large ergonomic** brake and winding handles
  - **Water and dust proof** encapsulated electronics
  - **Strong and accurate** NTS\*\* certified tape with stainless steel conductors
  - **Full depth** STAINLESS STEEL and TEFLON probe
  - **Long Lasting** flexible link between the tape and probe
  - **"Third hand"** built in casing hanger
- The standard tapes are jacketed in POLYETHYLENE, marked in FEET & 1/100th FT.
  - The tape lengths are from 100ft to 2500ft in steps of 100ft. Intermediate lengths are to special order.
  - All units carry a 24 Month warranty.
- \* 400ft (150m) and longer models use aluminum reels for lightness.

### AVAILABLE

- Metric graduated tapes
- KYNAR and TEFLON jacketing
- A tough protective NYLON carrying bag

\*\* All HERON Water Level Meter tapes comply with **US-GGG-T-106E** (plus/minus 1/100 ft per 100 feet)

The HERON dipper-T Water Level Meter is a Top Quality Instrument

**Heron has spoken to  
ground water professionals  
and listened to their comments.**

***Subsequently, we have built  
the instrument they asked for.***

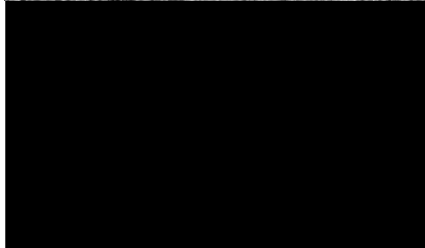

**Here are some benefits and features you expect:**
